Photo Shoot Day

This is a list of different things to think of and do on the day of or the day before the photo shoot. Obviously, if we have an early morning shoot, you might want to do all of these the night before.

1. Make sure you have all of the outfits you want to wear assembled and ready to transport to the shoot location(s). This includes any special under garments and jewelry you need for each outfit.
2. Guys and girls both, make sure you shave. Girls need to shave under their arms because some of the poses you do may have your arms up.
3. Remember to bring all of the props you want to use during the session.
4. Remember to apply as much of your makeup as possible before you leave home. It will save more of the session time for shooting.
5. The night before your shoot make sure to get plenty of sleep.
6. Also, the night before, begin drinking plenty of water to help make sure you aren't dehydrated.
7. Use only un-scented, clear deodorant. Don't use anything that might stain or leave smudges on your clothes.
8. If your eyes are red be sure to use visine or other eye treatments.
